

IU987-25PK

Address Card For 900 Series Detectors x25

General

The IU987 is a replacement, un-addressed address card for use in 900 bases for 900 series detectors. This card provides a unique, patented addressing method with simple, user friendly and accurate identification of a detector's location.

The IU987-25PK is a package of 25 IU987

Functionality

Address information is held in the detector base, not the detector head. This means that the address remains in the same location regardless of how many times the detector head is replaced (for example during servicing or maintenance). It also allows for different types of detecting heads to be interchanged to meet changes in building use without changing the address location.

Application and Operation

The IU987 is a plastic, coded card containing seven 'pips'. The address is set by simply removing the 'pips' with a screwdriver according to a chart supplied with the bases. The coded card is then inserted into the side of the base where it locks into position. When the detector head is rotated into the base, the remaining 'pips' on the card operate the address buttons on the base of the detector and the address is read by the detector electronics.

Addressing in this manner simplifies and speeds up installation and commissioning, and can be used on Series 930, 950, 970 and 990 device ranges.

Details

- Easy addressing
- Address remains in the same location regardless of detector
- 25pcs of IU987

IU987-25PK

Address Card For 900 Series Detectors x25

Especificaciones técnicas

Físico

Physical dimensions	56 x 20 x 4 mm
Net weight	< 1 g
Colour	Blanco
Mounting type	Enchufe

Medioambiental

Entorno	Interior
